Abstract

Creditbulls Coin is a decentralized, proof-of-work (PoW) based, censorship-resistant, and publicly accessible blockchain project. It is designed to support strong privacy guarantees on every transaction. We believe that privacy is a fundamental requirement to protect the user and expand the use of cryptocurrency.

We have designed Creditbulls Coin to be a new cryptocurrency from the ground up to enable easy-to-use, fully-private payments by closely following the Sapling protocol. Every account is equipped with a view key to grant its holder read-only permission for the details of that account.

With this protocol, we are challenging previous patterns of full node usability. The Creditbulls Coin networking layer supports WebRTC with WebSockets, making it trivial for all users to make a true P2P connection with no other setup requirements. Our first Creditbulls Coin implementation is built such that it can be extended to run a full node directly in the browser in future iterations. And our focus is to lower the barrier to entry so that any person with a computer feels comfortable enough to run a full node.

Introduction

Privacy is controversial, but it shouldn't be. In fact, privacy leads to innovation – social evolution through changing laws, and the freedom to simply be you. Take doors on houses or passwords for bank accounts, both of which are precautions most people take even though they might say they have nothing to hide.

At Creditbulls Coin, we are building something we're truly proud of: a cryptocurrency that does not compromise on privacy or accessibility. Digital cash that embodies using privacy for good. We are all moving towards becoming fully digital global citizens where our every activity and purchase is carefully logged, analyzed and sold. In this world, privacy is more important than ever and has growing demand worldwide.

Popular cryptocurrencies like Bitcoin, Ethereum, and others are the least private way of transacting – their protocols fundamentally work on complete transparency to verify transactions. Though other privacy coins exist, they all either lack the privacy guarantees they've promised or are so hard to use they barely have any real usage (and oftentimes both).

There is huge untapped potential here – but only if users feel truly protected by their cryptocurrency, and are able to access it. Just like the introduction of SSL/TLS in the '90s opened up the floodgates to e-commerce (the predecessors of HTTPS), we believe that an accessible privacy coin will lead to a new class of industries of borderless products and companies.

In this paper, we cover how Creditbulls Coin works, and why we've built it this way. While we endeavor to explain things as much as possible and go over all relevant terminology, some parts will require a basic understanding of elliptic curve cryptography.

Why Decentralization

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There may have been times in history where this sort of internal configuration played an important role, but, in an age with the information of the world available at the click of a button, it's time to rethink.

2021 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. WallStreetBets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root. Months before any of these events made international news, Cryptocurrency itself comes from the idea of disrupting routine and redefining how wealth can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within a system of enforceable rules.

In the ever-shifting economic landscape, cryptocurrencies that do not take their independence into their own hands struggle with a tenuous existence. When the rules of the game are changed against their favor, they have no option but to comply; regardless of the consequences.

About Creditbulls Coin

We've building a platform to make it easier for you.

Creditbulls Coin is a complete payment solution. Creditbulls Coin has many advantages over its contemporaries as it is launched with a fully functional ecosystem that ensures usability from the very first day. Creditbulls Coin deals mainly with trading and mining, our first think artificial intelligence (AI) Trade, Forex trade and also crypto Trade. Creditbulls Coin will play a different role in driving transactions on a number of platforms, Globally including Shopping, Trading, Travel, Staking, Gaming, and many more. We also believe our system is very strong. Because we have a highly expert management. It will also be the backbone of Creditbulls Coin Referral binary \$ Reward Program. This policy are making our usage of Creditbulls Coin and increasing our popularity as well as value So our investing into starts-up that is a very high potential to grow.

The Creditbulls Coin is an enterprise to tap into what has been declared the innovation of the century - the cryptocurrency industry. Cryptocurrency is a digital asset that can buy goods and services but uses an online ledger rather than a country's fiat currency.

Creditbulls Coin (alxc) is a community-oriented project with a focus on the financial growth and development of the global community, which was launched in January 2022. At that time, none of us thought this was the beginning of a revolution.

Projects based on community participation are our untamed wilderness in the future. As we gradually move away from rigid social structures and traditional ways of thinking, we are free to discover new ways to solve problems and establish connections with others.

The Creditbulls Coin ecosystem recognises the importance of breaking the long-established formulaic success model and building a path to financial freedom and creativity for humanity.

A community is made up of thousands or even millions of interconnected moments. By studying those attracted by our project, we realise that real financial power does not come from a single perspective but harmonious cooperation.

We began to develop the Creditbulls Coin in earnest with this idea.

Uniqueness

Powerful blockchain technologies

Our revolutionary blockchain service is designed to create your own blockchain ecosystem, secure digital assets and access to funding all over the world.

Decentralized

The platform helps investors to make easy to barter their tokens.

Most Secure

Creditbulls Coin is one of the best coin that offers excellent privacy features and keeps your Bitcoins secure.

Global System

The Creditbulls Coin Token can be bought by anyone from any part of the world, except countries where crypto is restricted.

Mobile App

ICO Crypto Mobile for the future of funding that powering dat for the new equity blockchain.

Smart Contract

Creditbulls Coin is a smart contract based crypto which uses BEP-20 interface, making it secure and immutable.

Smart Wallet

With Smart Wallet you can easily pay and buy directly through your mobile.

Security

Creditbulls Coin is safe by design. It is an ownership-renounced token with each buy and sells automatically contributing to a liquidity pool that is locked forever.

Trust

In the cryptocurrency market, Trust is paramount. That means full transparency not only in the community support and development but also in any security effort. Examples include top-grade audits of \$Creditbulls Coin's code, and liquidity tokens being locked to strongly reduce any risk of malicious behavior

Transparency

Transparency is one of the Creditbulls Coin Team's highest priorities. New volunteers are frequently added to the AlexecoinTeam to ensure community representation, and community voting is regularly conducted to help decide the best direction for the

project. For example, community votes have been taken on how to allocate funds, which exchanges to focus on, which shelters to donate to, and even which logo to use for the Creditbulls Coin token. The Creditbulls Coin Team hopes to evolve this into a governance system based on Creditbulls Coin holdings.

Network

Creditbulls Coin is a BEP-20 token on Binance Smart Chain. BSC is secured through the proof-of-stake consensus mechanism. 21 validators are elected every 24 hours to validate transactions and maintain blockchain security. These validators have to stake a certain amount of BNB coins with Binance to be eligible.

Creditbulls Coin Ecosystem

Creditbulls Ai Trade

AI trading refers to the buying and selling of assets without the need for human interaction. This means that artificial intelligence trading covers a broad range of automated trading techniques, through which the AI software makes trades based on pre-programmed conditions.

Artificial intelligence technology uses historical data to enable it to analyse millions of possible scenarios in a split second. The technology can then make logical decisions based on this information.

Creditbulls Mart

Creditbulls mart is unique online market place and market maker for business connecting buyers and seller in online making it easier to do business anywhere in the world.

Creditbulls Coin Ecosystem

Creditbulls Travel

Creditbulls travel is a tagline of make memories is one of nthe fastest growing travel agency. All are uses Creditbulls Coin to explore new places and book your flights, Hotel,holidays and much more.in the future more hotels restaurant and shops will be set up with crypto wallet on a smartphone to accept global payments in seconds and we are read for future.

Creditbulls Wallet

Creditbulls Coin wallet is crypto bassesd highly secuired mobile and web wallet to store crypto assets, It will be supported Bitcoin, Ethereum Usdt BNB.

Creditbulls Exchanger

Creditbulls exchanger Designed for secure, Quick, And Easy Trading of major crypto currencies like bitcoin, Ethereum, Bnb, Usdt etc.

Creditbulls Rummy

Card game lovers all over the world have been enjoying Rummy games for couple of centuries now. The fantastic card game has numerous variations that are played in different parts of the world. Advancements in science and technology ushered in online rummy.

Creditbulls Academy

Card game lovers all over the world have been enjoying Rummy games for couple of centuries now. The fantastic card game has numerous variations that are played in different parts of the world. Advancements in science and technology ushered in online rummy.

Creditbulls Booth

Creditbulls Coin highly recommend Cashpoint or Creditbulls booth for their service, honesty and integrity. Their Experience and the fact they run own technical team places them far above the competition.

Tokenomics

Process of Creditbulls Coin

We are minted 210 million Creditbulls Coin and it will be distributed in Creditbulls Coin holder during various systems

- 48% Community
- 12% IEO
- 8% NFT Maker
- 6% Burning
- 6% Management
- 5% Reserved
- 4% Utility Proposed
- 3% Developers
- 3% Games
- 2% Administration
- 1% Airdrop
- 1% Socialism
- 1% Miscellaneous

Token Distribution

This section provides basic information about the distribution and planning of tokens

Token Name	CBULLS COIN
Token Symbol	CBULLS
Token Supply	210,000,000 CBULLS
Blockchain Technology	Binance Smart Chain (BEP-20)
Creditbulls Smart Contract Address	0x1a57f1d4f651B3aa7cFfee7B2A74B208A341514E

Roadmap

The use of crypto-currencies has become more widespread, and they are now increasingly accepted as a legitimate currency for transactions.

Address : 71-75 Shelton Street, Covent Garden, London, WC2H 9JQ
